REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistake or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in the back of this manual direct to: Commander, U.S. Army Troop Support Command, ATTN: AMSTR-MCTS, 4300 Goodfellow Boulevard, St. Louis, MO 63120-1798. A reply will be furnished directly to you.

*This manual supersedes TM 5-6115-464-24P/TO 35C2-3-445-4/NAVFAC P-8-624-24P/SL4-07523A, dated 30 October 1978.

SECTION I
INTRODUCTION

1. Scopa

This joint Army, Navy, Air Force and Marine Corps manual lists repair parts and special tools required for the performance of organizational, intermediate (field), direct and general support and depot maintenance of the generator set. The following paragraphs are keyed to applicable users. All users should read paragraph 4, Special Information, prior to using this manual.

2. General

This Repair Parts and Spacial Tools List is divided into the following sections:

- a. (ALL) Repair Parts - Section II. A list of repair parts authorized for the performance of maintenance at the organizational, intermediate (field), direct support, general support and depot level in figure and item number sequence.
- b. (ALL) Special Tools, Test and Support Equipment - Section III. A list of special tools, test and support equipment authorized for the performance of maintenance at the organizational, intermediate (field), direct support, general support and depot level (Not applicable).
- c. National Stock Number and Reference Number Index - Section IV. A list of National Stock Numbers in numerical sequence, followed by a list of reference numbers appearing in all the listings, in alphanumeric sequence, cross-referenced to the illustration figure number and item number.

3. Explanation of Columns

The following provides an explanation of columns in the tabular lists in Sections II and III.

- a. (ALL) Illustration. (Column 1.) This column is divided as follows:
 - (1) Figure number. (Column 1a) indicates the figure number of the illustration on which the item is shown.
 - (2) Item number. (Column 1b) indicates the number used to identify the item on the illustration.
- b. (ALL) Source, Maintenance, and Recoverability Codes (SMR), (Column 2).
 - (1) Uniform Source Codes applicable to all Military Services. GENERAL: Source codes are assigned to support items to indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

Code

Definition

- PA** Item procured and stocked for anticipated or known usage.
- PB** Item procured and stocked for insurance purposes because essentiality dictates that a minimum quantity be available in the supply system.
- PC** Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.
- PD** Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issues or outfittings. Not subject to automatic replenishment.
- PE** Support equipment procured and stocked for initial issue or outfittings to specified maintenance repair activities.
- PF** Support equipment which will not be stocked but which will be centrally procured on demand.
- PG** Item procured and stocked to provide for sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which because of probable discontinuance or shutdown of production facilities would prove uneconomical to reproduce at a later time.
- KD** An item of depot overhaul/repair kit and not purchased separately. Depot kit defined as a kit that provides items required at the time of overhaul or repair.
- KF** An item of a maintenance kit and not purchased separately. Maintenance kit defined as a kit that provides an item that can be replaced at organizational or intermediate levels of maintenance.
- KB** Item included in both a depot overhaul/repair kit and a maintenance kit.
- MO** Item to be manufactured or fabricated at organizational level.
- MF** Item to be manufactured or fabricated at intermediate maintenance levels.
- Air Force - Intermediate (*)
Army - General Support (*)
Marine Corps - 4th Echelon
Navy - Ashore
- MG** Item to be manufactured or fabricated at both afloat and ashore intermediate maintenance levels - Navy use only.
- MD** Item to be manufactured or fabricated at depot maintenance level.
- AO** Item to be assembled at organizational level.
- AF** Item to be assembled at intermediate maintenance levels.

Air Force - Intermediate (*)
Army - Direct Support (*)
Marine Corps - 3rd Echelon
Navy - Afloat

AH Item to be assembled at intermediate maintenance levels.

Air Force - Intermediate (*)
Army - General Support (*)
Marine Corps - 4th Echelon
Navy - Ashore

AG Item to be assembled at both afloat and ashore intermediate maintenance level - Navy use only.

AD Item to be assembled at depot maintenance levels.

XA Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.

XB Item is not procured or stocked. If not available through salvage, requisition.

XC Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number.

XD A support item that is not stocked. When required, item will be procured through normal supply channels.

(2) Uniform Maintenance Codes applicable to all Military Services:

GENERAL: Maintenance Codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The Maintenance Codes are in the third and fourth position of the Uniform SMR Code Format.

(a) **USE (THIRD POSITION):** The Maintenance Code entered in the third position indicates the lowest maintenance level authorized to remove, replace, and use the support item. The Maintenance Code entered in the third position indicates one of the following levels of maintenance.

Code	Application/Explanation
O	Support item is removed, replaced, used at the organizational level of maintenance.
F	Support item is removed, replaced, used at the following intermediate levels: USAF - Intermediate (*) USA - Direct Support (*) USN - Afloat USMC - 3rd Echelon
G	Support item is removed, replaced, used at both afloat and ashore intermediate levels: Navy Only.
H	Support item is removed, replaced, used at the following intermediate levels: USAF - Intermediate (*) USA - General Support (*) USN - Ashore (Only) USMC - 4th Echelon

D Support items that are removed, replaced, used at depot only:

USAF - Depot, Mobile Depot and Specialized Repair Activity
USA - Depot, Mobile Depot and Specialized Repair Activity
USN - Aviation Rework, Avionics and Ordnance Facilities, and Shipyards
USMC - Depot

(b) REPAIR (FOURTH POSITION): The Maintenance Code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capacity to perform complete repair (i.e., all authorized maintenance functions).

Code	Application/Explanation
O	The lowest maintenance level capable of complete repair of the support item is the organizational level.
F	The lowest maintenance level capable of complete repair of the support item is the following intermediate level: USAF - Intermediate (*) USA - General Support (*) USN - Ashore (Only) USMC - 4th Echelon
H	The lowest maintenance level capable of complete repair of the support item is the following intermediate level: USAF - Intermediate (*) USA - General Support (*) USN - Ashore (Only) USMC - 4th Echelon
G	Both afloat and ashore intermediate levels are capable of complete repair of support item: Navy Only.
D	The Lowest maintenance level capable of complete repair of the support item is the depot level. USAF - Depot, Mobile Depot, and Specialized Repair Activity USA - Depot, Mobile Depot, and Specialized Repair Activity USN - Aviation Rework, Avionics and Ordnance Facilities, and Shipyards USMC - Depot
L	Repair restricted to designated Specialized Repair Activity.
Z	Nonreparable. No repair is authorized.
B	No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are procured for the maintenance of this item.

(3) Uniform Recoverability Codes applicable to all Military Services:
GENERAL: Recoverability Codes are assigned to support items to indicate the disposition action on unservicable items. The recoverability code is entered in the fifth position of the Uniform SMR Code Format as follows:

Recoverability Codes

Definition

- Z** Nonreparable item. When unservicable, condemn and dispose at the level indicated in column 3.
- O** Reparable item. When uneconomically reparable, condemn and dispose at organizational level.
- F** Reparable item. When uneconomically reparable, condemn and dispose at the following intermediate levels:
- USAF - Intermediate (*)
 - USA - Direct Support (*)
 - USN - Afloat
 - USMC - 3rd Echelon
- H** Reparable item. When uneconomically reparable, condemn and dispose at the following levels:
- USAF - Intermediate (*)
 - USA - General Support (*)
 - USN - Ashore
 - USMC - 4th Echelon
- D** Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.
- L** Reparable item. Repair, condemnation and disposal not authorized below depot/Specialized Repair Activity level.
- A** Item requires special handling or condemnation procedure because of specific reasons (i.e., precious metal content, high-dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.
- c. (USMC) Special Stockage Indicator Code and Replacement Factor Column (3).

(1) Special Stockage Indicator Code (Column 3a). This column reflects the condition under which certain maintenance parts, (parts assigned NSNs and coded in the "P" series source code of the SMR code), are stocked. The codes are explained as follows:

- No Code** Indicates that the part may or may not be authorized in initial allowances to using or supporting organizations. The manner of determining initial allowances is explained in paragraph (2) below.
- I** Applied to maintenance parts for which predicted consumption would not warrant inclusion in Mount-Out but for which a quantity of one (1) is authorized as insurance for Mount-Out using a 360-day criteria. This criteria is based on the total density of equipments employed by the DIV/WING TEAM. Mount-Out allowances, so authorized, will be stocked by the FSR or the MWSG in the case of Marine Wing peculiar equipment, as applicable.
- D** Applied to maintenance parts that are not considered critical or essential to be on hand and are, therefore, not authorized in initial allow-

ances; however, these items are stocked within the Supply System and may be requisitioned based upon usage.

T Indicates that the part is authorized in garrison operating allowances in order to comply with state and local laws; however, the part is not authorized in Mount-Out since it is not combat essential.

(2) Replacement Factor (Column 3b). This column reflects the replacement factor assigned to each nationally stock numbered maintenance repair part. This factor is assigned to the repair part on its first appearance in the publication. The replacement factor, expressed as a decimal, indicates the average rate at which the type of item so coded has been used by Marine Corps field units or the rate which design engineers anticipate the item will fail, wear out, or otherwise require replacement. All computations are based on a replacement period of one year. Therefore, a replacement factor of 0.08, applied to an item in this stock list, indicates that eight out of every one hundred of such items used in the end item of equipment to which this publication pertains, is predicted to need replacement in one year. Likewise, 0.004 reflects that four out of every thousand in use are predicted to require replacement in one year, while 2.0 shows that every one in use is predicted to be replaced twice during each year.

(a) Initial authorized stockage levels of consumable and salvageable items for an organization are to be computed for predicted consumption based on the number of items employed and/or supported by an organization within the number of days for which stockage is authorized. In computing Garrison Operating Stock or Mount-Out, authorized levels can be determined by the requiring Marine Corps unit by multiplying the replacement factor times the quantity used per equipment, times the number of end items employed by the using organization or supported by the service organization, times the authorized day level expressed in months and divided by 12. Specific formulas and examples are provided in Marine Corps Order, MCO P4400.79.

The replacement factors used in initial stockage computations should be revised, if warranted, after significant usage is experienced in accordance with the guidelines of MCO 4400.32A. The following formula replacement factor, "X" represents actual usage experience (1 year), "A" represents the application per equipment, and "B" represents the number of equipments supported.

$$\frac{X}{W} = A \times B$$

(b) Initial allowances for maintenance float items (recoverability codes "R" and "D") for the FMF and appropriate post and stations are as furnished by Initial Issue Actions.

Changes to maintenance replacement rates resulting from actual usage may require recomputation of maintenance float allowances by holding units. Any required recomputation of maintenance float allowances will be made in accordance with MCO 4000.6.

(c) The replacement factor for same as (S/A) items is indicated upon the first appearance of the item in the major combination, component or assembly.

d. (ALL) National Stock Number (Column 4) indicates the National Stock Number assigned to the item and will be used for requisitioning purposes.

e. (ALL) Description, (Column 5). Indicates the Federal item name and any additional description of the item required. The abbreviation "w/e" when used as part of the nomenclature, indicates that the National Stock Number includes all armament, equipment, accessories and repair parts issued with the item. A part number or other reference number is followed by the applicable five digit Federal Supply Code for Manufacturer. If two reference numbers and Federal Supply Codes for manufacturer are listed, the first listing refers to the Department of the Defense Drawing Number, the second listing refers to the actual part manufacturer. Items that are included in kits and sets are listed below the name of the kit or set with the quantity of each item in the kit or set indicated in the quantity incorporated in unit column.

f. (ALL) Unit of Measure (U/M). Indicates the standard of the basic quantity of the listed item as used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e.g., ea, in, pr, etc.). When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

g. (ALL) Quantity Incorporated in Unit., (Column 7). Indicates the quantity of the item used in the assembly group. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g., shims, spacers, etc.).

h. (MC) Quantity per Equipment, (Column 8). Indicates the consolidated quantity of a maintenance part used on an end item upon the parts first appearance in this publication.

4. Special Information.

a. Usable on codes are shown in the description column. Uncoded items are applicable to all models and/or serial number range. Identification of the usable on codes of this publication are:

<u>Code</u>	<u>Used On</u>
CLD	MEP-004A
CLF	MEP-103A
CLE	MEP-113A
CZL	MEP-004A (Serial Nos. KZ0001 thru Z01226)
DGH	MEP-113A (Serial No. RZ60001 and subs)

b. Army organizational maintenance personnel will extract the items which they require from Section II, 3rd or 4th position of column 2 of the direct and general support RPSTL. Parts which are manufactured or assembled at a higher level than that authorized to install the part are indicated by the use of higher level code in the source column.

c. Stockage Information:

(1) Air Force Stockage information is contained in Initial Supply Support Lists issued separately from this publication by Sacramento Air Logistics Center in accordance with AFM 67-1, part 1, Chapter 12.

(2) Navy stockage objectives are contained in Consolidated Shipboard Allowance List as furnished separately from this publication by the Ship Parts Control Center.

(3) Marine Corps Stockage information is contained in columns 3a and 3b of the tabular listing of this publication.

(4) Army stockage is demand based in accordance with AR 710-2. Repair parts listed in this publication represent those authorized for use at indicated maintenance levels and will be requisitioned on an as required basis until stockage is justified in accordance with AR 710-2.

5. How to Locate Repair Parts.

a. (ALL) When National Stock Number or Reference Number is unknown:

(1) Using the table of contents, determine the assembly group, i.e., batteries and related parts, exhaust and breather pipes, within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups, and listings are divided into the same groups.

(2) Find the illustration covering the assembly group to which the repair part belongs.

(3) Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) Using the Repair Parts Listing, find the figure and item number noted on the illustration.

b. (ALL) When National Stock Number or Reference Number is known:

(1) Using the Index of National Stock Numbers and Reference Numbers, find the pertinent National Stock Number or Reference Number. The index is in ascending NSN sequence followed by a list of reference numbers in alphanumeric sequence, cross-referenced to the illustration figure number and item number.

(2) Using the Repair Parts Listing, after finding the figure and item number, locate the figure and item number in the Repair Parts List.

6. Abbreviations.

Abbreviations used in preparation of this Technical Manual are in accordance with MIL-STD-12.

AWG	American Wire Gage	mtg	mounting
ea	each	RH	right hand
gen	generator	R.P.M.	revolutions per minute
hz	hertz	sw	switch
KW	kilowatt	VDC	volts, direct current
LH	left hand		

7. Recommendation for Maintenance Publication Improvements. Report of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted as follows:

a. Army DA Form 2028, direct to: Commander, US Army Troop Support and Aviation Materiel Readiness Command, ATTN: DRSTS-MP, 4300 Goodfellow Boulevard, St. Louis, MO 63120.

b. Air Force AFTO Form 22 in accordance with T.O. 00-5-1, direct to: Commander, Sacramento Air Logistics Center, ATTN: MMST, McClellan AFB, CA 95652.

c. Marine Corps NAVMC 10772, direct to: Commanding General, Marine Corps Supply Activity, ATTN: Code 848, 1100 S. Broad Street, Philadelphia, PA 19146.

d. Navy Letter, direct to: Commanding Officer, US Navy Ship Parts Control Center, ATTN: Code 783, Mechanicsburg, PA 17055.

By Order of the Secretaries of the Army, the Navy, and the Air Force:

E. C. MEYER
General, United States Army
Chief of Staff

Official:

ROBERT M. JOYCE
Brigadier General, United States Army
The Adjutant General

W. M. ZOBEL
Rear Admiral, CEC, U.S. Navy
Commander
Naval Facilities Engineering Command

Official:

LEW ALLEN, JR., General, USAF
Chief of Staff

JAMES P. MULLINS
General, USAF, Commander, Air Force
Logistics Command

H. A. HATCH
Lieutenant General, USMC
Deputy Chief of Staff for Installations
and Logistics

DISTRIBUTION:

Active Army.

To be distributed in accordance with DA Form 12-25D, Direct and General Support Maintenance requirements for Generator Sets, Engine Driven: 15 KW, 60 HZ Precise Power, 15 KW, 400 HZ Precise Power, and 15 KW, 60 HZ Utility.

Marine Corps:

MARCORPS CODE: AGC

In line 6 of paragraph 2-1a the manual states the engine has 6 Cylinders. The engine on my set only has 4 Cylinders. Change the manual to show 4 Cylinders.

Callout 16 on figure 4-3 is pointing at a bolt. In key to figure 4-3, item 16 is called a shim - Please correct one or the other.

I ordered a gasket, item 19 on figure B-16 by NSN 2 910-00-762-3001. I got a gasket but it doesn't fit. Supply says I got what I ordered, so the NSN is wrong. Please give me a good NSN

The Metric System and Equivalents

Linear Measure

1 centimeter = 10 millimeters = .39 inch
 1 decimeter = 10 centimeters = 3.94 inches
 1 meter = 10 decimeters = 39.37 inches
 1 dekameter = 10 meters = 32.8 feet
 1 hectometer = 10 dekameters = 328.08 feet
 1 kilometer = 10 hectometers = 3,280.8 feet

Weights

1 centigram = 10 milligrams = .15 grain
 1 decigram = 10 centigrams = 1.54 grains
 1 gram = 10 decigrams = .035 ounce
 1 dekagram = 10 grams = .35 ounce
 1 hectogram = 10 dekagrams = 3.52 ounces
 1 kilogram = 10 hectograms = 2.2 pounds
 1 quintal = 100 kilograms = 220.46 pounds
 1 metric ton = 10 quintals = 1.1 short tons

Liquid Measure

1 centiliter = 10 milliliters = .34 fl. ounce
 1 deciliter = 10 centiliters = 3.38 fl. ounces
 1 liter = 10 deciliters = 33.81 fl. ounces
 1 dekaliter = 10 liters = 2.64 gallons
 1 hectoliter = 10 dekaliters = 26.42 gallons
 1 kiloliter = 10 hectoliters = 264.18 gallons

Square Measure

1 sq. centimeter = 100 sq. millimeters = .155 sq. inch
 1 sq. decimeter = 100 sq. centimeters = 15.5 sq. inches
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 sq. feet
 1 sq. dekameter (are) = 100 sq. meters = 1,076.4 sq. feet
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47 acres
 1 sq. kilometer = 100 sq. hectometers = .386 sq. mile

Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet

Approximate Conversion Factors

To change	To	Multiply by	To change	To	Multiply by
