Section	III. SPECIAL TOOL LIST (NOT APPLICABLE)		
	IV. NSN & REFERENCE NUMBER NDEX70	

**SECTION I.
INTRODUCTION**

1. Scope. This joint Army, Navy and Air Force manual lists repair parts and special tools required for the performance of organizational, intermediate (field), direct and general support and depot maintenance of the generator set. The following paragraphs are keyed to applicable users. All users should read paragraph 4, Special Information, prior to using this manual.

NOTE: (Army) Repair parts listed represent those authorized for use at indicated maintenance levels and will be requisitioned on an "as required" basis until stockage is justified by demand in accordance with AR 710-2.

NOTE: (Army) Organizational Maintenance personnel are to extract the maintenance coded "O" items they require from Section II, Column (2), Third and/or Fourth Position of the Direct and General Support Repair Parts and Special Tools List.

2. General. This Repair Parts and Special Tools Lists is divided into the following sections:

a. *(ALL) Repair Parts — Section II.* A list of repair parts authorized for the performance of maintenance at the organizational intermediate (field), direct support, general support and depot level in figure and item number sequence,

b. *(ALL) Special Tools, Test and Support Equipment — Section III.* (Not Applicable)

c. *National Stock Number and Reference Number Index — Section IV.* A list of National stock numbers in numerical sequence, followed by a list of reference numbers appearing in all the listings, in alphanumeric sequence, cross-referenced to the illustration figure number and item number.

3. Explanation of Columns. The following provides and explanation of columns in the tabular lists in Sections II and III.

a. *(ALL) Illustrations (Column 1).* This column is divided as follows:

(1) *Figure number.* Indicates the figure number of the illustration on which the item is shown.

(2) *Item number.* Indicates the number used to identify the item on the illustration.

b. *(ALL) Source, Maintenance and Recoverability Codes (SMR) (Column 2).*

(1) Uniform Source Codes applicable to all Military Services.

GENERAL: Source Codes are assigned to support items to indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions

of the Uniform SMR Code format as follows:

<i>Code</i>	<i>Definition</i>
PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for insurance purposes because essentiality dictates that a minimum quantity be available in the supply systems.
PC	Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.
PD	Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issues or outfittings. Not subject to automatic replenishment.
PE	Support equipment procured and stocked for initial issue or outfittings to specified maintenance repair activities.
PF	Support equipment which will not be stocked but which will be centrally procured on demand.
PG	Item procured and stocked to provide for sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which because of probable discontinuance or shutdown of production facilities would prove uneconomical to reproduce at a later time.
KD	An item of depot overhaul/repair kit and not purchased separately. Depot kit defined as a kit that provides items required at the time of overhaul or repair.
KF	An item of maintenance kit and not purchased separately. Maintenance kit defined as a kit that provides an item that can be replaced at organizational or intermediate levels of maintenance.
KB	Item included in both a depot overhaul/repair kit and a maintenance kit.
MO	Item to be manufactured or fabricated at organizational level.
MF	Item to be manufactured or fabricated at intermediate maintenance levels. Air Force — Intermediate (*) Army — General Support (*) Navy — Ashore
MG	Item to be manufactured or fabricated at both afloat and ashore intermediate maintenance levels—Navy use only.
MD	Item to be manufactured or fabricated at depot maintenance level.
AO	Item to be assembled at organization level.
AF	Item to be assembled at intermediate maintenance levels. Air Force — Intermediate (*) Army — Direct Support (*) Navy — Afloat
(*) NOTE: For USAF and USA Safeguard Program, only Code "F" will be used to denote intermediate maintenance. On joint programs, use of either code F or H by the joining service will denote intermediate maintenance in USAF and USA Safeguard Program.	
AH	Item to be assembled at intermediate maintenance levels. Air Force — Intermediate (*) Army — General Support (*) Navy — Ashore
AG	Item to be assembled at both afloat and ashore intermediate level — Navy use only.
AD	Item to be assembled at depot maintenance levels.
XA	Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.

<i>Code</i>	<i>Definition</i>
XB	Item is not procured or stocked. If not available through salvage, requisition.
XC	Installation drawings, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number.
XD	A support item that is not stocked. When required, item will be procured through normal supply channels.

(* NOTE: For USAF and USA Safeguard Program, only Code "F" will be used to denote intermediate maintenance. On joint programs, use of either code F or H by the joining service will denote intermediate maintenance in USAF and USA Safeguard Program.

(2) Uniform Maintenance Codes applicable to all Military Services:

GENERAL: Maintenance Codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The Maintenance Codes are in the third and fourth position of the Uniform SMR Code Format.

(a) **USE (third position):** The Maintenance Code entered in the third position indicates the lowest level maintenance level authorized to remove, replace, and use the support item. The Maintenance Code entered in the third position indicates one of the following levels of maintenance.

<i>Code</i>	<i>Application/Explanation</i>
O	Support item is removed, replaced, used at the organizational level of maintenance.
F	Support item is removed, replaced, used at the following intermediate levels. USAF — Intermediate (*) USA — Direct Support (*) USN — Afloat
G	Support item is removed, replaced, used at both afloat and ashore intermediate levels: Navy only.
H	Support item is removed, replaced, used at the following intermediate levels.
(* NOTE: For USAF and USA Safeguard Program, only Code "F" will be used to denote intermediate maintenance. On joint programs, use of either code F or H by the joining service will denote intermediate maintenance in USAF and USA Safeguard Program. USAF — Intermediate (*) USA — General Support (*) USN — Ashore (only)	
D	Support items that are removed, replaced, used at Depot only. USAF — Depot, Mobile Depot and Specialized Repair activity. USA — Depot, Mobile Depot and Specialized Repair activity. USN — Aviation Rework, Avionics and Ordnance Facilities and Shipyards.

(b) **REPAIR (fourth position):** The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions).

<i>Code</i>	<i>Application/Explanation</i>
O	The lowest maintenance level capable of complete repair of the support item is the organizational level.
F	The lowest maintenance level capable of complete repair of the support item is the following intermediate level: USAF — Intermediate (*) USA — General Support (*) USN — Ashore (only)
H	The lowest maintenance level capable of complete repair of the support item is the following intermediate level: USAF — Intermediate (*) USA — General Support (*) USN — Ashore (only)
(* NOTE: For USAF programs and the USA Safeguard Program, Code F will be used to denote intermediate maintenance. On joint programs, use of either Code F or H by the joining Service will denote intermediate maintenance to USAF and the USA Safeguard Program.	
G	Both afloat and shore intermediate levels are capable of complete repair of support item: Navy only.
D	The lowest maintenance level capable of complete repair of the support item is the depot level. USAF — Depot, Mobile Depot, and Specialized Repair activity. USA — Depot, Mobile Depot, and Specialized Repair Activity. USN — Aviation Rework, Avionics and Ordnance Facilities, Shipyards.
L	Repair restricted to designated specialized Repair Activity.
Z	Nonreparable. No repair is authorized.
B	No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are procured for the maintenance of this item.

(3) Uniform Recoverability Codes applicable to all Military Services:

GENERAL: Recoverability Codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the uniform SMR Code Format as follows:

<i>Recoverability Codes</i>	<i>Definition</i>
Z	Nonreparable item. When unserviceable, condemn and dispose at the level indicated in column 3.
O	Reparable item. When uneconomically repairable, condemn and dispose at organizational level.
F	Reparable item. When uneconomically repairable, condemn and dispose at the following intermediate levels: USAF — Intermediate (*) USA — Direct Support (*) USN — Afloat
H	Reparable item. When uneconomically repairable, condemn and dispose at the following levels: USAF — Intermediate (*) USA — General Support (*) USN — Ashore

(* NOTE: For USAF programs and the USA Safeguard Program, Code F will be used to denote intermediate maintenance. On joint programs, use of either Code F or H by the joining Service will denote intermediate level of USAF and the USA Safeguard Program.

Recoverability Codes

Definition

- D Repairable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.
- L Repairable item. Repair, condemnation and disposal not authorized below depot/specialized Repair Activity level.
- A Item requires special handling or condemnation procedure because of specific reasons (i.e., precious metal content, high-dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. (USMC) *Special Stockage Indicator Code and Replacement Factor (Column 3)*. (Not Applicable)

d. (ALL) *National Stock Number (Column 4)*. Indicates the National Stock Number assigned to the item and will be used for requisitioning purposes.

e. (ALL) *Description*, Indicates the Federal item name and any additional descriptions of the item required. The abbreviation "w/e" when used as part of the nomenclature, indicates that the National Stock Number includes all armament, equipment, accessories and repair parts issued with the item. Apart number or other reference number is followed by the applicable five digit Federal Supply Code for manufacturer in parentheses. If two reference numbers and Federal Supply Codes for manufacturer are listed, the first listing refers to the Department of Defense Drawing Number, the second listing refers to the actual part manufacturer. Items that are included in kits and sets are listed below the name of the kit or set with the quantity of each item in the kit or set indicated in the quantity incorporated in unit column.

f. (ALL) *Unit of Measure (U/M)*. Indicates the standard of the basic quantity of the listed item as used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e.g., ea, in, pr, etc.). When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

g. (ALL) *Quantity Incorporated in Unit Indicates* the quantity of the item used in the assembly group. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g., shims, spacers, etc.).

4. Special Information.

a. (ALL) Identification of the usable on codes of this publication are:

Code	Used On
A	DOD Model MEP-018A
B	DOD Model MEP-023A

Repair parts not symbolized are applicable to all models covered in this manual.

b. (Army) Parts which require manufacture or assembly at a level higher than that authorized for installation will indicate in the source column, the higher level.

c. Stockage Information.

(1) Air Force stockage information is contained in Initial Supply Support Lists issued separately from this publication by Sacramento Air Logistics Center in accordance with AFM 67.1, part 1, chapter 12.

(2) Navy stockage objectives are contained in Consolidated Shipboard Allowance List as furnished separately from this publication by the Ship Parts Control Center.

5. How to Locate Repair Parts

a. (ALL) When National Stock Number or reference number is unknown:

(1) Using the table of contents, determine the functional group; i.e., batteries and related parts, exhaust and breather pipes, within which the repair part belongs. This is necessary since illustrations are prepared for functional groups, and listings are divided into the same groups.

(2) Find the illustration covering the functional group to which the repair part belongs.

(3) Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) Using the Repair Parts Listing, find the figure and item number noted on the illustration.

b. (ALL) When National Stock Number or reference number is unknown:

(1) Using the Index of National Stock Numbers and Reference Numbers, find the pertinent National Stock Number or reference number. This index is in ascending NSN sequence followed by a list of reference numbers in alphanumeric sequence, cross-referenced to the illustration figure number and item number.

(2) After finding the figure and item number, locate the figure and item number in the repair parts list.

6. Abbreviations

- AC alternating current
- AMP amperage
- AWG American Wire Gage
- BRS brass
- CAD PLD. cadmium plated
- CD circuit description
- CRES corrosion- resistant steel
- CS case
- DC direct current
- DIA. diameter
- EA each
- GPH gallons per hour
- ID inside diameter
- IN inch(s)
- INTL internal
- LG long, length
- LH left hand
- MM. millimeter
- MTG mounting
- NOM. nominal
- NPT National taper pipe

6. Abbreviations (Cont'd)

NPTF	tight joints
OHM	ohmmeter
OD	outside diameter
PLD	plated
RHO	righthand
THD	thread
THK	thick
TY	type
UNC	unified coarse thread
UNF	unified finethread
V	volt

7. Reporting of Errors. You can help to improve this manual by calling attention to errors and by recommending improvements. Your letter, DA Form 2028 (Recommended

Changes to Publications), and/or DA Form 2028-2 (Recommended Changes to Equipment Technical Manuals), may be used. Copies of DA Form 2028-2 are attached in the back of the manual for your use. Please mail your recommended changes directly to:

a. Army DA Form 2028, directly to: Commander, U.S. Army Troop Support Command, ATTN: AMSTR-MCTS, 4300 Goodfellow Blvd., St. Louis, Missouri 63120-1798. A reply will be furnished directly to you.

b. Air Force AFTO Form 22 in accordance with T.O. 00-5-1, directly to: Commander, Sacramento Air Material Area, ATTN: MMST McClellan AFB, California 95652.

c. Navy Letter, directly to: Commanding Officer, U.S. Navy Ship Parts Control Center, ATTN: Code 783, Mechanicsburg, PA 17055.

By Order of the Secretaries of the Army, the Navy, and the Air Force:

BERNARD W. ROGERS
General, United States Army
Chief of Staff

Official:

PAUL T. SMITH
Major General, United States Army
The Adjutant General

D. G. ISELIN
Rear Admiral, CEC, U. S. Navy
Commander,
Naval Facilities Engineering Command
DAVID C. JONES, General, USAF
Chief of Staff

Official:

JAMES J. SHEPARD, Colonel, USAF
Director of Administration

Distribution:

To be distributed in accordance with DA Form 12-25D, organizational maintenance requirements for Generator Sets, Engine Driven, 10 KW, 60 HZ, Utility, 10 KW, 400 HZ Precise Power.

☆ U.S. GOVERNMENT PRINTING OFFICE : 1993 - 342-421 (81028)

The Metric System and Equivalents

Linear Measure

1 centimeter = 10 millimeters = .39 inch
 1 decimeter = 10 centimeters = 3.94 inches
 1 meter = 10 decimeters = 39.37 inches
 1 dekameter = 10 meters = 32.8 feet
 1 hectometer = 10 dekameters = 328.08 feet
 1 kilometer = 10 hectometers = 3,280.8 feet

Weights

1 centigram = 10 milligrams = .15 grain
 1 decigram = 10 centigrams = 1.54 grains
 1 gram = 10 decigrams = .035 ounce
 1 dekagram = 10 grams = .35 ounce
 1 hectogram = 10 dekagrams = 3.52 ounces
 1 kilogram = 10 hectograms = 2.2 pounds
 1 quintal = 100 kilograms = 220.46 pounds
 1 metric ton = 10 quintals = 1.1 short tons

Liquid Measure

1 centiliter = 10 milliliters = .34 fl. ounce
 1 deciliter = 10 centiliters = 3.38 fl. ounces
 1 liter = 10 deciliters = 33.82 fl. ounces
 1 dekaliter = 10 liters = 2.64 gallons
 1 hectoliter = 10 dekaliters = 26.42 gallons
 1 kiloliter = 10 hectoliters = 264.18 gallons

Square Measure

1 sq. centimeter = 100 sq. millimeters = .155 sq. inch
 1 sq. decimeter = 100 sq. centimeters = 15.5 sq. inches
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 sq. feet
 1 sq. dekameter (are) = 100 sq. meters = 1,076.4 sq. feet
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47 acres
 1 sq. kilometer = 100 sq. hectometers = .386 sq. mile

Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet
